A HYBRID PC FOR THE FUTURE

Welcome to the new generation of device category. The ultra-small Lamina AWON Pro is built with both local and cloud-based OS performance in mind. Delivering a hybrid optimisation of the desktop PC.

WiFi, Ethernet and optional LTE connectivity deliver wireless performance to leverage the latest in cloud personal computing with stable performance and minimal latency.

A locally installed Windows 11 Pro OS sets the proposition apart from legacy Thin Client devices for a truly hybrid PC solution.

A new category in computing.

The pandemic has transformed the way we work. With a new era of hybrid working employees now rely heavily on being able to work remotely and securely from any location, and more importantly from any device.

This new computing category demands a solution that ensures high-end, cloud-based PC performance, no matter what device is being used by the employee.

Leverage hybrid benefit of Windows 365.

Unlike Thin Client PC's, the AWON Pro comes with a Windows 11 Pro OS license pre-installed, evolving the proposition from a purely local-based OS to a hybrid OS solution with both local and cloud OS optimisation.

The transition of Windows into a hybrid local and cloud OS brings new possibilities to organizations of all sizes and opens up Hybrid Benefit discounts when subscribing to the Windows 365 cloud service. Organisations can then choose whether a PC, with its locally installed OS, or a Cloud PC, with its cloud-based OS, is the best fit for a particular user or role in the organisation – or in some cases, use both.

LAMINA

DEVICE SPECIFICATION

Dimensions	119 x 116.6 x 35mm
Weight	780g
Colour	Black
Processor	Qualcomm® Snapdragon SC7180 (QSIP) Octa-core, 64 Bit architecture Up to 2.40GHz 8 nm Process Technology
Graphics	Adreno 618
Memory	4GB LPDDR4X
Storage	Internal: 64GB eMMc Flash Expandable: up to 200GB via Micro SDHC/XC
Wireless	Wi-Fi 802.11ac Wave 2, 802.11a/b/g, 802.11n Dual Band 2.4GHz and 5.0GHz 2x2 MIMO configuration 4G LTE (on some models)
Modem	Snapdragon X15 LTE modem Support for 600 Mbps LTE **LTE Downlink Features:** 3x20 MHz carrier aggregation, up to 256-QAM, up to 4x4 MIMO on two aggregated carriers, LTE Cat 12 up to 600 Mbps **LTE Uplink Features:** Qualcomm® Snapdragon™ Upload+ 2x20 MHz carrier aggregation, Up to 64-QAM, LTE Cat 13 up to 150 Mbps
Bluetooth	Bluetooth 5.0
Ethernet	RJ45 USB 2.0 interface Integrated 10 / 100M transciever Supports power down/link down power saving
I/O Connectivity	• 1 x USB 2.0 Type-A • 1 x Micro SDHC/XC • 1 x USB 2.0 Type-C (Power only) • 1 x USB 3.2 Gen1 Type-A • 1 x HDMI • 1 x RJ45 Ethernet • 1 x Micro SIM (on some models)
OS	Windows 11 Pro

IN THE BOX

1 x Lamina AWON Pro

1 x Power Supply Unit (PSU) and Power Cable

1 x Quick Start Guide
